Notes

This quote is for the Toxicology lab.

With Mac Mini there are two options for displays.

Good - Viewsonic VX2253mh - \$159

* Better - Samsung SyncMaster S22A650S - \$255

Best - Apple Thunderbolt Display - \$949

Mac Mini and MacBookAir with 256GB drive are for toxicology lab allowing for both Windows 7 (Allowing Full support for Starfruit), and Mac OS. Office is for Tox Lab to replace Office 2004 running on Powebook. Parallels allows for windows to run in the Mac OS. Airport express allows for wireless in the Tox Lab and will provide networking for the Air and other wiseless devices in the back of the office.

If the 6th gen airport extreme is used then the Airport express is not needed unless you want to use it to replace the Airport express in the Autopsy room.

Other products needed to make thei system work are components provided by Starfruit.

Quantity 2 Starfruit Signature Card Reader (DUII Part No. 274-744-4 for Vista, Windows 7 Professional Edition or above) to sign electronically.

* Item selected and put on quote.
